Meet the Inventor of HugAlign

Hi, I'm Colin the inventor of the HugAlign Body Support & Alignment pillow. Over the many years of enjoying life and working in various fields, I accumulated and suffered many injuries that left me in chronic pain. There was no medical solution to some of my injuries, and I was left suffering in pain all day and night. I was miserable, fatigued, frustrated and angry. These sleepless nights turned into desperation to find a sleep solution that worked. I tried most products that I could find out and all types of rehabilitating programs out there. Some helped, but all of them left me needing more – *and I knew I could do better!*

The HugAlign pillow was created to solve the problem of restless nights and chronic pain.
